

DESCRIPTION

These wired in-ear earphones with USB-C port ensure a fast and stable connection for a wide range of smartphones. They feature a built-in microphone for answering and making calls, and a controller that lets you manage your music with ease. Perfect for both professional and leisure activities, these earphones offer functionality and comfort in a compact, ultra-lightweight design.

Universal compatibility

The integrated USB-C port allows you to connect the earphones directly to your devices without the need for additional adapters. Enjoy your music, calls or podcasts on your smartphone, iPad or laptop with these comfortable earphones.

Integrated microphone

This USB-C earphones features a built-in microphone, ideal for making calls and ensuring the best audio quality for your recordings.

With built-in controller

The remote control integrated into the cable allows you to easily manage your music and calls, meeting your needs for playing/pausing songs, adjusting volume, changing tracks and answering/rejecting calls.

In-ear design

The ergonomic design of these earphones ensures comfort over long periods of use, adapting perfectly to the ear and providing an exceptionally secure fit.

Lightweight and easy to carry

These earphones are perfect for use while travelling, taking the bus, going for a run or other leisure activities. The cable is easy to store, carry and prevents tangles in your everyday life.
